§ 203.44

agreement, a share of the production from all the qualified wells in the unit participating area would be allocated to your lease each month according to the participating area percentages. Subject to the price conditions in §203.48, you must apply the RSV prescribed under §203.41 as required under the following paragraphs (c)(1) through (c)(3) of this section.

- (1) You must apply the RSV to the earliest gas production occurring on and after the later of:
- (i) May 3, 2004, for an RSV earned by a qualified well or qualified phase 1 ultra-deep well on a lease that is located entirely or partly in water less than 200 meters deep;
- (ii) May 18, 2007, for an RSV earned by a qualified deep well on a lease that is located entirely in water more than 200 meters deep; or
- (iii) The date that the first qualified well that earns your lease the RSV begins production (other than test production).
- (2) You must apply the RSV to only gas production:
- (i) From all qualified wells on the non-unitized area of your lease, regardless of their depth, for which you have met the requirements in §203.35 or §203.44; and,
- (ii) Allocated to your lease under an MMS-approved unit agreement from qualified wells on unitized areas of your lease and on unitized areas of other leases in the unit, regardless of their depth, for which the requirements in \$203.35 or \$203.44 have been met.
- (3) The allocated share under paragraph (c)(2)(ii) of this section does not increase the RSV for your lease. None of the volumes produced from a well that is not within a unit participating area may be allocated to other leases in the unit.

Example: The east half of your lease A is unitized with all of lease B. There is one qualified 19,000-foot TVD SS deep well on the non-unitized portion of lease A, one qualified 18,500-foot TVD SS deep well on the unitized portion of lease A, and a qualified 19,400-foot TVD SS deep well on lease B. The participating area percentages allocate 32 percent of production from both of the unit qualified deep wells to lease A and 68 percent to lease B. If the non-unitized qualified deep well on lease A produces 12 BCF and the unitized qualified deep well on lease A produces 15

BCF, and the qualified deep well on lease B produces 10 BCF, then the production volume from and allocated to lease A to which the lease an RSV applies is 20 BCF [12 + (15 + 10) * (0.32)]. The production volume allocated to lease B to which the lease B RSV applies is 17 BCF [(15 + 10) * (0.68)].

- (d) You must begin paying royalties when the cumulative production of gas from all qualified wells on your lease, or allocated to your lease under paragraph (c) of this section, reaches the applicable RSV allowed under §203.31 or §203.41. For the month in which cumulative production reaches this RSV, you owe royalties on the portion of gas production that exceeds the RSV remaining at the beginning of that month.
- (e) You may not apply the RSV allowed under $\S 203.41$ to:
- (1) Production from completions less than 15,000 feet TVD SS, except in cases where the qualified deep well is re-perforated in the same reservoir previously perforated deeper than 15,000 feet TVD SS;
- (2) Production from a deep well or phase 1 ultra-deep well on any other lease, except as provided in paragraph (c) of this section;
- (3) Any liquid hydrocarbon (oil and condensate) volumes: or
- (4) Production from a deep well or phase 1 ultra-deep well that commenced drilling before:
- (i) March 26, 2003, on a lease that is located entirely or partly in water less than 200 meters deep, or
- (ii) May 18, 2007, on a lease that is located entirely in water more than 200 meters deep.

[73 FR 69512, Nov. 18, 2008]

§ 203.44 What administrative steps must I take to use the royalty suspension volume?

- (a) You must notify the MMS Regional Supervisor for Production and Development in writing of your intent to begin drilling operations on all deep wells and phase 1 ultra-deep wells; and
- (b) Within 30 days of the beginning of production from all wells that would become qualified wells by satisfying the requirements of this section, you must:

- (1) Provide written notification to the MMS Regional Supervisor for Production and Development that production has begun; and
- (2) Request confirmation of the size of the royalty suspension volume earned by your lease.
- (c) Before beginning production, you must meet any production measurement requirements that the MMS Regional Supervisor for Production and Development has determined are necessary under 30 CFR part 250, subpart I.
- (d) You must provide the information in paragraph (b) of this section by January 20, 2009 if you produced before December 18, 2008 from a qualified deep well or qualified phase 1 ultra-deep well on a lease that is located entirely in water more than 200 meters and less than 400 meters deep.
- (e) The MMS Regional Supervisor for Production and Development may extend the deadline for beginning production for up to one year for a well that cannot begin production before the applicable date prescribed in the definition of "qualified deep well" in § 203.0 if it meets all of the following criteria.
- (1) The well otherwise meets the criteria in the definition of a qualified deep well in §203.0.
- (2) The delay in production occurred after reaching total depth in the well.

- (3) Production (other than test production) was expected to begin from the well before the applicable deadline in the definition of a qualified deep well in §203.0. You must provide a credible activity schedule with supporting documentation.
- (4) The delay in beginning production is for reasons beyond your control, such as adverse weather and accidents which MMS deems were unavoidable.

[69 FR 3510, Jan. 26, 2004, as amended at 69 FR 24054, Apr. 30, 2004. Redesignated and amended at 73 FR 69512, 69513, Nov. 18, 2008]

§ 203.45 If I drill a certified unsuccessful well, what royalty relief will my lease earn?

Your lease may earn a royalty suspension supplement. Subject to paragraph (d) of this section, the royalty suspension supplement is in addition to any royalty suspension volume your lease may earn under §203.41.

(a) If you drill a certified unsuccessful well and you satisfy the administrative requirements of §203.47, subject to the price conditions in §203.48, your lease earns an RSS shown in the following table. The RSS is shown in billions of cubic feet of gas equivalent (BCFE) or in thousands of cubic feet of gas equivalent (MCFE) and is applicable to oil and gas production as prescribed in §204.46.

If you have a certified unsuccessful well that is:

Then your lease earns an RSS on this volume of oil and gas production as prescribed in this section and $\S\,203.46:$

- An original well and your lease has not produced gas or oil from a deep well or an ultra-deep well,
- (2) A sidetrack (with a sidetrack measured depth of at least 10,000 feet) and your lease has not produced gas or oil from a deep well or an ultra-deep well,
- (3) An original well or a sidetrack (with a sidetrack measured depth of at least 10,000 feet) and your lease has produced gas or oil from a deep well with a perforated interval the top of which is from 15,000 to less than 18,000 feet TVD SS.

5 BCFE.

0.8 BCFE plus 120 MCFE times sidetrack measured depth (rounded to the nearest 100 feet) but no more than 5 BCFE.

2 BCFE.

- (b) This paragraph applies to oil and gas volumes you report on the OGOR-A for your lease under §216.53.
- (1) You must apply the RSS prescribed in paragraph (a) of this section, in accordance with the requirements in §203.46, to all oil and gas produced from the lease:
- (i) On or after December 18, 2008, if your lease is located in water more

than 200 meters but less than 400 meters deep; or

- (ii) On or after May 3, 2004, if your lease is located in water partly or entirely less than 200 meters deep.
- (2) Production to which an RSV applies under §\$203.31 through 203.33 and §\$203.41 through 203.43 does not count toward the lease RSS. All other production, including production that is
